

$$\left| \frac{S_2}{e} \right| = \frac{RC\omega}{\sqrt{[1 - (RC\omega)^2]^2 + (RC\omega)^2}}$$

$$\omega \rightarrow 0 \quad \left| \frac{S_2}{e} \right|_{dB} \rightarrow -\infty$$

$$\omega \rightarrow \infty \quad \left| \frac{S_2}{e} \right| \rightarrow \frac{1}{\omega} \rightarrow 0 \Rightarrow \left| \frac{S_2}{e} \right|_{dB} \rightarrow -\infty$$

P bande

$$\left. \begin{aligned} \frac{S_2}{e} &= \left(-\frac{S_2}{jRC\omega} \right) / e \\ \frac{S_2}{e} &= \frac{-jRC\omega}{1 + jRC\omega + (jRC\omega)^2} \end{aligned} \right\} \Rightarrow \frac{S_3}{e} = \frac{1}{1 + jRC\omega + (jRC\omega)^2}$$

$$\left| \frac{S_3}{e} \right| = \frac{1}{\sqrt{[1 - (RC\omega)^2]^2 + (RC\omega)^2}}$$

$$\omega \rightarrow 0 \quad \left| \frac{S_3}{e} \right| \rightarrow 1 \quad \left| \frac{S_3}{e} \right|_{dB} \rightarrow 0 \text{ dB}$$

$$\omega \rightarrow \infty \quad \left| \frac{S_3}{e} \right| \rightarrow 0 \quad \left| \frac{S_3}{e} \right|_{dB} \rightarrow -\infty$$
